Rray Wallet

1 Part One

About Rray Wallet

What Is Rray Wallet?

Rray Wallet

An intelligent social application based on cryptocurrency adopting AI and blockchain etc.

With the insertion of socializing function and Rray intelligent chat system,

Rray Wallet created a brand new social commercial system.

Features

AI Carried

Rray intelligent chatting system inserted to create a brand new social system.

Deep Learning Based

With the help of deep learning technique, Rray learns to chat like a human.

Social Apps Supported

Various third-party social applications are linked to make socializing closer.

Rray Intelligent Chatbot

Rray is not only an intelligent chatting software, but also a fearless and distinct new human.
It is a marketing talent who continuously self-perfects its communication skills via deep learning.

Intelligent Marketing

Various communication styles help users to perform active marketing.

Super Intelligence

Natural language processing provides accurate understanding on dialogue and semantics.

All Response

User's requirements are comprehensively responded, making services more considerate.

Intelligent Trainer – Master Ray

Master Ray is a special feature to train Rray, which take users as chatbot to carry out practical AI training. It help Rray to learn progress and provide ongoing vitality to make it more and more humanized, just like Rray's Exobrain.

- AI Training
- Marketing Independence
- Knowledge Spreading
